About me

As a recent graduate in software engineering, I am keen to apply my skills in quality assurance and software testing while continuously developing my experience in programming and learning more techniques and programming languages and development myself. I am committed to improving the quality of software and advancing my technical capabilities, with the ultimate goal of moving to the role of version manager, where I can ensure smooth and efficient software releases.

Project

Rental Car
Mar 2023 - Apr 2023

I worked on a car rental project in the C# language, and the project aimed to rent the car and display the cars, and the data was linked to a file with the possibility of returning it, adding and deleting it from the data

Travel A to Z
Apr 2024 - Jul 2024

We worked on a tourist application that is displayed on the web using and the idea of the project was to display tourist places in Jordan with the possibility of putting it in an organized schedule that organizes the dates and times of your trips, and we used Api and no sql, and the project was also created through visual studio using asp.net

Plants Store
Apr 2024 - May 2024

I applied the project to Visual studio on the language of c#. My idea was to sell many plants at different prices
